

Echidna Certified Report

Smart Contract: LHILecceNFT

Date: May 2025

Summary of Results

This report certifies the results of automated fuzzing performed using Echidna on the LHILecceNFT smart contract. The contract passed all assertion-based tests across minting, burning, transfers, royalties, and ownership logic.

Fuzzing Metrics

- Unique Instructions: 7437
- Unique Codehashes: 1
- Corpus Size: 36
- Seed Used: 4319304414058420810
- Total Calls Executed: 50188

Important Note

This report represents the outcome of automated fuzzing tests only. It is not a formal manual audit. Users and integrators should combine these results with manual code review and further security analysis before deployment.
